

Jurisdiction's name:	Switzerland
Information on Tax Identification Numbers	
Section I – TIN Description	
<p><u>Entities</u></p> <p>Article 2 paragraph 1 letter g of the draft Swiss Federal Law on international automatic exchange of information in tax matters designates the „Unternehmens-Identifikationsnummer“ (UID-number) as the tax identification number for entities in the context of AEOI.</p> <p>The UID-number has been introduced in 2011. It is a unique identification number that is centralized at the federal level and used not only in tax matters, but also for other purposes (i.e. as trade register number, for custom purposes). Its legal basis is the Swiss Federal Law on the UID dated 18 June 2010 (<i>UIDG</i> for its acronym in German [SR 431.03]) as well as the respective Swiss Ordinance on the UID dated 26 January 2011 (<i>UIDV</i> for its acronym in German [SR 431.031]).</p> <p>Entities to which a UID-number is assigned are specified in the Swiss Federal Law on the UID (Article 3 paragraph 1 letter c) as well as in the Swiss Ordinance on the UID (Article 1). Among others, the following entities are assigned a UID-number:</p> <ul style="list-style-type: none"> • entities registered in the commercial register, • individuals and legal entities that are not registered in the commercial register, but whose taxes or duties are collected by the Federal Administration or its agencies, • individuals who engage in commercial activities or exercise a liberal profession and who are not covered by item 1 or 2 (UID-number is assigned for each single business), • partnerships without legal personality that must be identified for administrative purposes because of their economic activity, • foreign or international legal entities that have a place of business in Switzerland or that need to be identified for the enforcement of Swiss law. <p>In general, a UID-number is assigned to a company as a legal entity and not to individual operating units of which the company consists.</p> <p>The UID-number is automatically assigned to entities at the moment of their registration in an administrative register that is connected to the UID-system. In cases where no UID is assigned, entities can submit a request to the Swiss Federal Statistical Office for registration in the UID-system.</p> <p>A register is maintained for the allocation, management and use of the UID-number by the Swiss Federal Statistical Office (UID-register). Part of this register is accessible through WEB interface to the public (https://www.uid.admin.ch). The register allows to look-up to which entity a specific UID-number is assigned to but also to search for a UID-number of a specific entity using its name, value added tax-number (VAT-number) or commercial register number. Publicly available information on UID-entities comprises for example data on status, address (domicile or place of business) as well as data in the commercial register.</p> <p>The Central Business Names Index called “Zefix” is the main data bank for companies registered for commercial purposes. This register also allows for similar search functions as those described for the UID-register. This register is also accessible through WEB interface to the public (http://www.zefix.ch/).</p> <p><u>Individuals</u></p> <p>A tax identification number for individuals has not yet been designated.</p>	

Additional information on the mandatory issuance of Tax Identification Numbers (TINs)

Question 1 – Does your jurisdiction automatically issue TINs to all residents for tax purposes?

Individuals	<u>Yes</u>	Entities	Yes
	No		<u>No</u>

Question 2a – If you answered no to Question 1 with respect to individuals, describe those instances where individuals are not being automatically issued a TIN.

Article 2 paragraph 1 letter f of the Swiss Federal Law on international automatic exchange of information in tax matters designates the Old Age and Survivors Insurance Number (Swiss social security number; AHV-Versichertennummer) as TIN for individuals in the context of AEOI. All individuals that are resident in Switzerland automatically receive the Old Age and Survivors Insurance Number.

Question 2b – If you answered no to Question 1 with respect to Entities (as defined by the CRS), describe those instances where Entities are not being automatically issued a TIN.

Article 2 paragraph 1 letter g of the Swiss Federal Law on international automatic exchange of information in tax matters designates the company identification number (Unternehmens-Identifikationsnummer; UID) as TIN for entities in the context of AEOI. The vast majority of entities automatically receive a TIN. In particular certain collective investment vehicles may not automatically receive a TIN. In these cases, the Federal Tax Administration has the possibility to ask the Federal Statistics Office to issue a UID to be used as TIN.

Section II – TIN Structure

The structure of a UID-number can be modelled as follows: CHE-999.999.99C

The UID-number consists of nine digits, is randomly assigned and does not contain any relevant information (UID-number is a non-descriptive number). In order to indicate the Swiss origin of the number, it contains the prefix "CHE". This prefix corresponds to the alpha-3 variant of ISO 3166-1. The last digit (C) of the UID-number is a check digit and is determined on the basis of a standard calculation (modulo 11).

For better readability, a hyphen is put between the prefix and the digital part of the UID-number. Analogous to the prefix, the numerical part is split into three blocks of three numbers, each block being separated from the other by a dot.

Further information on the structure of the UID-number can be found under:
http://www.bfs.admin.ch/bfs/portal/fr/index/themen/00/05/blank/03/02.html#parsys_8881

Section III – Where to find TINs?

The UID-number is not evidenced on an official card or other official document. However, the UID-number may be indicated on the front page of a VAT-return. In case an entity does not know its UID-number, it may use the UID-register to determine it. By entering the entity's legal name, VAT-number or commercial register number, the UID-register allows to determine the corresponding UID-number, provided that the entity is recorded in the UID-register.

Please find below examples of a VAT-return on which the UID-number is shown:

a) German version of quarterly VAT-return

Abrechnungsperiode:	01.10.2014 - 31.12.2014	Q04/2014	
Einreichdatum und Zahlungsfrist:	28.02.2015		
Valuta (Verzugszins ab):	28.02.2015		
MWST-Nr:	CHE- <u>###.###.###</u> MWST		
Ref-Nr:	### ###
